

Pressroom Chemistry

Mijokum manufactures world class Pressroom Chemicals for the offset printing and packaging industry. Our range of Blanket Washes, Fountains Solutions and Plate Cleaners may be used in sheet fed presses manufactured by Heidelberg, Baldwin, Komori, KBA, Man Roland and Mitsubishi.

MIJOWASH FG (AUTO)

5 Litre Can
20 Litre Can
200 Litre Steel Drum

MIJOWASH FG (AUTO) is a water miscible blanket & roller wash. When used in conjunction with water it will quickly remove dried ink & lint, leaving blankets & rollers with an ink receptive surface. MIJOWASH FG (AUTO) is suitable for automatic washing systems & for manual application. Zero aromatics combined with corrosion inhibition make this advanced wash suitable for Heidelberg, Manroland, Komori and other manufacturers' specifications.

BLANKET CONDITIONER

500 ml Bottle

BLANKET CONDITIONER is used for intensive cleaning & conditioning of blankets. The product features a strong cleaning action & removes hardened ink and embedded pigments in one easy step. It creates a velvety clean surface for excellent sheet release and restores blanket to like-new condition. This product is formulated to be used manually to extend the life of heavily stained blankets.

MIJOFOUNT

5 kg Can
20 kg Can

MIJOFOUNT is a fountain solution concentrate for sheet-fed presses suitable for use with soft to medium hardness waters. It incorporates a strong buffer system and maintains a stable pH. It allows operators to run presses at lower water speeds and helps to reduce start-up waste. MIJOFOUNT achieves a thin and even film for effective wetting of the plate and ensures a good water/ink balance during the press run. It offers a good desensitizing action.

PLATE CLEANER

1 Litre Bottle
20 Litre Can

Plate Cleaner is an efficient cleaner and desensitizer for use on all types of printing plates exposed in a process. All ink, gum glaze, paper coating and oxidation residues are removed leaving non-image areas clean and desensitized. Plate imperfections such as scratches can be corrected as Plate Cleaner does not contain abrasives or scouring components.

GORILLA WASH

5 Litre Can
20 Litre Can

GORILLA WASH is a powerful, water miscible blanket & roller wash used for all offset printing applications. It is a powerful cleaner and degreaser. It is water miscible & will quickly remove ink, gum and paper contaminants, leaving blankets & rollers with an ink receptive surface. GORILLA WASH is suitable for manual application.

NEWSFOUNT ULTRA

5 kg Can
20 kg Can

NEWSFOUNT ULTRA is a fountain solution concentrate for web offset presses (coldset and heatset). It incorporates a strong buffer system and maintains a stable pH. It has been designed to run with soft to medium hardness waters. NewsFount Ultra offers excellent protection for all plates, including CtP plates. Newsfount Ultra achieves a thin and even film for effective wetting of the plate & ensures a good water/ink balance during the press run. It offers a good desensitizing action.

BLANKETLIFT

500 ml Bottle

BLANKETLIFT will swell an indented spot on the blanket to raise it to printing height. Indentations create an uneven printing surface causing the print to come out too light. Use of Blanketlift will swell the spot and correct the problem.

MIJOSOL-60

20 Litre Can
200 Litre Steel Drum

MIJOSOL-60 is a solvent with a high flash point. It is distilled and is a safer substitute to using kerosene in most industrial applications.
