

# BLANKETLIFT

Swelling agent for minor damages (indentations) on the rubber blanket surface

## GENERAL PURPOSE

Blanketlift will swell an indented spot on the blanket to raise it to printing height. Indentations create an uneven printing surface causing the print to come out too light. Use of Blanketlift will swell the spot and correct the problem.

## WORKING INSTRUCTION

Apply Blanketlift on the dented area of the rubber blanket. The amount of swelling can be influenced by the amount of time the chemical is left on the surface. Longer exposure will lead to more swelling (max. reaction time: 2 min). The remaining residue of the chemical can be wiped off with a wet cloth.

Please close the bottle immediately after use.

## STORAGE

- Store at room temperature in dry, well-ventilated area
- Keep away from heat & direct sunlight
- Keep the container closed
- Shelf life: One year from date of manufacture

## SAFETY

Read MSDS before using this product

## MAIN CHARACTERISTICS

- Very economical to use
- Instantly revives blanket low spots & dents
- Works quickly to eliminate expensive downtime
- Suitable for re-use in the same area
- Restores to proper printing surface
- Suitable for use on all types of rubber blankets

## PRPERTIES

	CHEMICALS	
APPLICATION	Appearance	Colorless to clear
	Density @25°C	1.02 – 1.04 g/cm <sup>3</sup>
	Flash point	No flash
	Odor	Characteristic
APPLICATION	Swelling properties	Strong
	Drying speed	Fast
	Water miscible	No
	Manual application	Yes

FEATURES	ADVANTAGES	BENEFITS
Efficient repairing	Extends blanket life	Reduces blanket costs
Easy to apply	Effective blanket repairer	User friendly
Quick action	Fast correcting to indented areas	Reduces down time
Can be applied to new Blankets	Prolongs blanket life	Reduces overall blanket costs
